SUMMARY

Software Engineer with 2.5+ years of experience building scalable web and mobile applications using **Java Spring Boot, REST APIs, Microservices, and modern frontend technologies**. Experienced in **AI-assisted development workflows** using tools such as **Claude, Cursor, Windsurf, ChatGPT, Gemini, Veo 3, Nano Banana, and Antigravity** to accelerate software delivery, debugging, UI prototyping, automation, and rapid product development. Proven experience integrating **OpenAI APIs**, building CI/CD pipelines, and delivering production-ready systems across fintech, conferencing, healthcare, alumni, and business platforms.

KEY ACHIEVEMENTS

- Delivered multiple production-grade systems including **Omnizia, City Remit, Conway, and enterprise business platforms**.
- Engineered CI/CD pipelines using **Jenkins, Docker Compose, and GitHub Actions**, significantly reducing deployment time.
- Integrated **OpenAI APIs** with Spring Batch workflows for AI-driven data processing and summarization.
- Developed and maintained **50+ REST APIs** supporting financial transactions and high-traffic systems.
- Leveraged **AI-assisted development tools** to accelerate debugging, prototyping, frontend implementation, and software delivery workflows.

EXPERIENCE

Brain Station 23 PLC. – *Software Engineer I*

Apr 2024 – Present

- Engineered and maintained 50+ RESTful APIs using **Spring Boot, Oracle, and Vue**.
- Architected a **reward point system** based on user transactions and referrals, improving user engagement.
- Designed and implemented **admin panel APIs** and **Thymeleaf-based UI** for operational monitoring.
- Built **CI/CD pipelines** using Jenkins and Docker Compose, reducing deployment time from hours to minutes.
- Currently developing **Omnizia**, a medical data intelligence platform using **Spring Batch** and **OpenAI API**.
- Leveraged **AI-assisted development tools** including Claude, Cursor, Windsurf, and ChatGPT for rapid debugging, prototyping, and delivery acceleration.

Synesis IT Ltd. – *Trainee Programmer*

Aug 2023 – Mar 2024

- Contributed to **Conway**, an enterprise-grade video conferencing platform.
- Diagnosed and resolved real-time issues, improving session stability and user experience.
- Developed meeting scheduling APIs and implemented a **recording alert system**.

BdOSN Girls Programming Camp – *Programming Instructor*

2020 – 2021

- Mentored 100+ students in algorithmic problem-solving and competitive programming.

PROJECTS

Omnizia (Java, Spring Boot, OpenAI)

Medical Data Intelligence

Developed automated data-processing jobs and integrated OpenAI APIs to generate AI-driven summaries and intelligent workflows.

City Remit (Java, Spring Boot, Oracle)

FinTech Solution

Built REST APIs and backend services for secure financial remittance operations and transaction management.

Conway (Java, Spring Boot, React)

Video Conferencing Platform

Engineered APIs for meeting scheduling, recording alerts, and enterprise communication workflows.

JU Alumni Association Platform (Full Stack Web Application)

Developed and maintained responsive organizational platform features, user workflows, and modern web interfaces.

Butterfly Group Bangladesh iOS App

In Development

Contributing to iOS application development, API integration, UI implementation, and deployment workflows.

Cardinal Tour & Travel (Business Website)

Developed and optimized a responsive travel and tourism platform with modern UI and performance-focused implementation.

RWWS (NGO Organizational Platform)

Built and customized web solutions for organizational management and public information delivery.

Amla Kamla (Frontend Web Application)

Developed a responsive modern web application using rapid prototyping and AI-assisted development workflows.

TECHNICAL SKILLS

- **Languages:** Java, JavaScript, C++, C
- **Backend:** Spring Boot, REST APIs, Microservices, Spring Data JPA, Spring Batch
- **Frontend:** React, Vue, Tailwind CSS, Thymeleaf
- **Databases:** MySQL, PostgreSQL, Oracle
- **DevOps & Cloud:** Jenkins, Docker, Docker Compose, GitHub Actions, CI/CD
- **AI & Productivity Tools:** OpenAI API, Claude, Cursor, Windsurf, ChatGPT, Gemini, Veo 3, Nano Banana, Antigravity
- **Tools & Concepts:** Git, Maven, Postman, IntelliJ IDEA, MVC, SOLID, Design Patterns

EDUCATION

Jahangirnagar University

Graduated Mar 2023

B.Sc. in Information Technology

GPA: 3.51/4.00

COMPETITIVE PROGRAMMING

- Solved 3500+ algorithmic problems across Codeforces, LeetCode, CodeChef, and LightOJ.
- **Expert** on Codeforces (Max Rating: 1694).
- 6+ years of experience in algorithms and data structures.
